Interactive Comment

Interactive comment on "Scale effects on runoff generation in meso-scale and large-scale sub-basins in the Luanhe River Basin" by P. Feng and J. Z. Li

Anonymous Referee #2

Received and published: 29 July 2008

The topic promised by the title is very interesting, but the scientific level of this paper is very low. The scale issue must be treated rigorously from the physical, mathematical and/or statistical point of view. And this in not the case, which means any of the explanations given in the paper are scientifically founded.
