Editorial Note

H. Savenije

The following paper has been published in the discussion forum of Hydrol. Earth Syst. Sci.:

Zhou, H., Li, W., Zhang, C., and Liu, J.: Ice breakup forecast in the reach of the Yellow River: the support vector machines approach, Hydrol. Earth Syst. Sci. Discuss., 6, 3175–3198, 2009.

It has come to the attention of the Executive Editors that the authors of this paper submitted an identical article to the Journal of Hydroinformatics. Authors should be aware that submitting the same paper to more than one journal is a serious offence in international publication. As a result we have no other choice than to formally withdraw this paper even though it has already been published on HESSD. Papers published in HESSD have the same status as papers published in a printed journal and hence cannot be simply removed. This editorial note serves as a formal withdrawal of the paper. As a result the discussion and the review process have been closed.
