Rainfall Intensity-Duration-Frequency data gives the curve equation  $I = a \cdot Tr^m D^{n-1}$  =  $21,65 Tr^{0,18} D^{(0,21-1)}$ , where  $I$  = rainfall intensity [mm/h],  $Tr$  = return time interval [years],  $D$  = rainfall duration [h], according to the classical rainfall duration curve rainfall-duration curve  $h = a' Tr^m D^n$ , where  $h$  = rainfall [mm])
