Received and published: 12 June 2009

Thank you the positive review and constructive suggestions, we will revise the manuscript accordingly:

Based on the reviewers comments, we will remove the separate and lengthy section on self-organization and instead briefly introduced the idea of self-organization in the C1179

introduction, with a sharper definition according to literature. The present paper is not meant to relate soil processes to soil self-organization; this will now be clarified.

The smaller specific comments will be corrected.
