Received and published: 31 March 2009

Thanks for the reviewer’s carefully evaluation and positive comments to our manuscript. Your general comments are responded point-by-point as below, and the specific comments are combined into the revised manuscript. A revised manuscript in pdf format has also been uploded in the Supplement.

Q1: But they may have to search other publications for more details such as the time period.

A1: The most LOPEXs publications are listed in the references of this paper, several new publications are also added in the revised version. More publications will appear

in other peer-review journals in the future.

Q2: Specific measurement variables.

A2: A renewed table1 about the measurement variables is added in the revised manuscript

Q3: Unique findings.

A3: These were added into the revised manuscript in the descriptions of each year's experiment

Q4: Data locations of each year's experiment.

A4: The LOPEXs research group holds the right to us the data, but it is opened to all researches who might be interesting in the research relevant to LOPEXs

Q5: Lessons learned from this year's experiment. A5: The lessons learned LOPEXs are added to the discussions of each year's experiment in the revised manuscript, the reader can follow our efforts from these description.

Q6: A revision listing the uniqueness of each year's experiment would be desirable for readers.

A6: These are partly combined with renewed table1 and partly in the revised manuscript.

Please also note the [Supplement](#) to this comment.
