

Interactive comment on “A comparative analysis of two wind velocity retrieval techniques by using a single Doppler radar” by Hee-Chang Lim and Dong-In Lee

Anonymous Referee #2

Received and published: 10 March 2009

Just a quick note: This paper was submitted to another journal first, but was not quite the subject matter they require, so the authors submitted it to HESS. My review (attached) was originally done for the other journal, so the format of my comments may not be exactly what HESS usually gets. Nevertheless, for expediency's sake, I am attaching my original review here.

Please also note the Supplement to this comment.
