Dear Dr. Toth, Thank you very much for your comments. As mentioned in the website of the journal “At the end of the open discussion the authors are asked to respond with final Author Comments. After 4 weeks (expandable to 8 weeks) or upon submission of a revised manuscript the final response phase is terminated, and the discussion paper and interactive comments are archived”. This common process was our understanding when we got the review comments. Then we decided to wait until the end of review process. The open discussion process ended just today and the revised manuscript will be ready within two weeks. We have considered and answered all the comments

C436

in the revised manuscript.

Sincerely Arash Malekian On behalf of the authors
