

Interactive comment on “Estimating spatially distributed monthly evapotranspiration rates by linear transformations of MODIS daytime land surface temperature data” by J. Szilagyi and J. Jozsa

A. Gelfan (Editor)

hydrowpi@aqua.laser.ru

Received and published: 1 May 2009

One of the referees has recommended publication, but only after some additional revision. I suggest the authors to revise the paper being as close as possible to the recommendations formulated by the reviewer and resubmit it within a reasonable time.
