

Interactive comment on “Modeling nutrient in-stream processes at the watershed scale using Nutrient Spiralling metrics” by R. Marcé and J. Armengol

M. Sivapalan

sivapala@uiuc.edu

Received and published: 17 March 2009

All I can say is that I am learning. It is always good to not just follow accepted practice, and question standard assumptions as we move forward. The authors should include a few sentences to allay the concerns of the reviewer and other readers, that the arguments and analyses of Doyle et al. (2003) apply to their site too. I hope the reviewer too is satisfied.
