

***Interactive comment on “Terrain surfaces and 3-D
landcover classification from small footprint
full-waveform lidar data: application to badlands”
by F. Bretar et al.***

F. Bretar et al.

Received and published: 30 June 2009

The paper has been rewritten in many parts taking into account the remarks of the reviewers. Generally speaking, many figures have been removed according to the wishes of the reviewers. Moreover, the text has been clarified, and some parts have been removed for a more comprehensive text. I will go into the details of the modifications by answering precisely to each reviewers in 2 others HESSD comments.
