Hi colleagues from Spain,

I have been waiting for that paper quite a while, I like it. This is an innovative report of an issue which we have been speculating since rather some time before, but we had no quantitative reports about. Congratulations ! Hope this will be published in HESS soon, not in HESSD only. But anyway, nobody really cares (or even understands) about the difference between HESSD and HESS, which is a pity (but a typical expression of our publication-inflation life).

regards,

C1032

Axel
