Reviewer 3 General comments.

The paper is concerned with complex amount of knowledge that needs to be explained and discussed widely in the text. The overall quality of the paper is a bit scarce. Abstract is confused. Discussion is incomplete. The paper contains mistakes, and several unclear sentences. The text should be revised by an English speaking person. The paper needs some major revision.

C1680

Reply: We restructured abstract, introduction, method, results and discussion in the reversion. Moreover, grammatical and writing style errors in the original version have been corrected by our colleague who is a native English speaker.
