

***Interactive comment on “Potential groundwater contribution to Amazon evapotranspiration” by Y. Fan and G. Miguez-Macho***

**M. Bierkens (Referee)**

[bierkens@geo.uu.nl](mailto:bierkens@geo.uu.nl)

Received and published: 28 September 2010

I have added my comments in the discussion part and the authors have sufficiently addressed my main concerns. Provided that they add the minor revisions to the paper that they promised to implement in their reply to my comment I advise it be accepted for publication.
