

Interactive comment on “Runoff properties of extreme discharges on Paraná and Uruguay rivers” by W. Vargas et al.

H. Cloke (Editor)

hannah.cloke@kcl.ac.uk

Received and published: 6 October 2010

Having carefully read the response of the 3 reviewers (one to shortly be uploaded) I do not recommend that you revise your manuscript. Instead you may like to take on board the substantial reviewer comments and make a new submission to HESSD in the future on this work.
