Received and published: 24 November 2010

Dear Authors, Before submitting a possible revised version to HESS, please give the referees the chance to post possible comments on your reply (as your reply came just on the closure of the discussion phase). I may also want to add an AE general comment on this discussion phase. I'd take this opportunity to solicit the referees to make possible further small comments, if any, before considering closed once and for all this interesting interactive phase on the web.

Interactive comment on Hydrol. Earth Syst. Sci. Discuss., 7, 6407, 2010.
