Received and published: 2 December 2010

We are grateful for the important and valuable comments and suggestions from you, which are of great help for us to clarify the concept and enrich the content of this manuscript. We have carefully considered your opinions and have modified our manuscript in accordance with the opinions together with a separate reply form. The revision has also shown how and where each point of the comments has been incorporated. The reply form has been submitted to the interaction discussion session of HESSD website. The revision of manuscript will be upload to HESSD website after the close of Interaction Discussion Session according to MS review rule.
