First of all, thank you for attention to our work. For you point out specific comments: (1) In the abstract there is a repetition of the three objective of the study, presented in the introduction too. Yes, I noticed it. I will revise it and resubmitted new abstract. (2) About data quality control method. Data quality control methods are some general methods, including data integrity checking, extreme check, and so on. We don't explain because this is only a preliminary processing for data. (3) Double mass curve method is introduced in the paper. Maybe the introduction is simple. I will revise this part. (4)
