Received and published: 28 May 2010

We thank the reviewer for carefully reading our manuscript and for his/her comments in the text. We have revised the manuscript following all received corrections/comments:

- A clarification of figure 1 has been added in the caption;
- Small typos and misplaced text has been corrected.
- We have added some lines to justify why we use a small data set to develop the method (for demonstration purposes), and then further what to expect/explore if this method will be applied to densely sampled LiDAR data.
