

***Interactive comment on “Untangling hydrological pathways and nitrate diffusive sources by chemical appraisal in a stream network of a reservoir catchment” by M. A. Yevenes-Burgos and C. M. Mannaerts***

**Anonymous Referee #3**

Received and published: 30 May 2011

This research is not novel however there is value added in terms of providing case studies. Discussion of methods and results is unclear. The figures and tabulated data do not clearly support the findings. Please note detailed analysis in the reports of Referees 1 and 2.
