Hydrology and Earth System Sciences Discussions

Interactive comment on "Classification of thermal waters based on their inorganic fingerprint and hydrogeothermal modelling" *by* I. Delgado-Outeiriño et al.

J.ÂăA. Moreira (Referee)

jmoreira@ualg.pt

Received and published: 26 June 2011

On the manuscript the authors stated that the from PCA components 1 and 2 reproduce 69% of the variability. A comment on the relevance of the other components is expected, namely about the weight of the other components, and its physical relevance or irrelevance.

Interactive comment on Hydrol. Earth Syst. Sci. Discuss., 8, 4559, 2011.
