Interactive comment on “Interpolation of groundwater quality parameters with some values below the detection limit” by A. Bárdossy

H. Cloke (Editor)

hannah.cloke@kcl.ac.uk

Received and published: 17 August 2011

I would like to congratulate the author on providing such an engaging piece of work that has stimulated so much interest from the community. The response to requests to review was clearly enthusiastic and that can only be testament to the quality of the research and the researcher. The manuscript itself was highly praised and only minor clarifications and further explanations and revised presentation were requested will be undertaken in a revised form of the manuscript.
