Authors' response to the comments of Referee 3

The Authors would like to thank the Referee for the valuable analysis made and comments given. We acknowledge the Referee as an expert from the Indian Institute of Technology with an excellent knowledge on water resources management, especially in the Indian context. Therefore his analysis of the submitted manuscript is very valuable.

RC: The utility of the paper will increase manifold if the different sections give appropriate data and its analysis. Without that, the paper in the present form appears more

C3548

as review of the work done elsewhere. Further, the aspects that are new in the paper may be highlighted.

The Reviewer also gives 8 specific comments on the paper

Authors' response: The Authors agree that the manuscript can be adapted accordingly. The authors will address all 8 comments given by the Referee. A detailed description of the adaptations made will be submitted together with the revised paper.
