

## ***Interactive comment on “Climate change impact on water resource extremes in a headwater region of the Tarim basin in China” by T. Liu et al.***

### **Anonymous Referee #2**

Received and published: 1 September 2011

Dear Editors,

It seems the authors have a lot more they could include in the paper, no wonder it is quite lengthy and of high calibre. I would suggest that this paper, together with others on climate change, be published in a special issue on the subject. This will go a long way to inform society, policy makers, financiers, etc on climate change adaptation/mitigation.

Thank you
