Interactive Comment

Interactive comment on "Domestic wells have high probability of pumping septic tank leachate" by J. E. Horn and T. Harter

J.E. Horn

judith.horn@kit.edu

Received and published: 13 September 2011

We thank the referee for taking the time to review our manuscript. We appreciate the reviewer's detailed comments and the opportunity to overcome the mentioned problems. In a revised version, we will put more focus on the description of our methods and pay more attention to the presentation of our results.

We indeed made a mistake with Figure 3: The correct Figure 3 and Figure 4a were mixed up with the consequence that Figure 4a is printed twice (though with a different scaling). The correct Figure 3 can be found below and will be uploaded as supplement.
