

***Interactive comment on “A novel explicit approach to model bromide and pesticide transport in soils containing macropores” by J. Klaus and E. Zehe***

**N. Romano (Editor)**

nunzio.romano@unina.it

Received and published: 11 March 2011

The deadline of interactive discussion is approaching and the Authors did not reply yet to the referee comments. I would encourage the Authors to post their own comments in time so as to possibly activate some further useful reactions from the referees. Moreover, while looking at the referees' comments and their judgements, I see some weakness in the present paper and therefore I'd also encourage the Authors to take the helpful comments into account when preparing a revision version, especially those raised by Ref#1.
