

Interactive comment on “Simple physics-based models of compensatory plant water uptake: concepts and eco-hydrological consequences” by N. J. Jarvis

M. Weiler (Editor)

markus.weiler@hydrology.uni-freiburg.de

Received and published: 3 October 2011

The three reviews were generally favorable of the manuscript and I think the ms would be very valuable for HESS, but the reviewers also raised a couple of important questions and points that need to be addressed in a revised manuscript. I will also send the revised ms at least to one of the reviewers. Best regards Markus
