

***Interactive comment on “Hydrological response of
a small catchment burned by experimental fire” by
C. R. Stoof et al.***

G.H. de Rooij (Editor)

gerrit.derooij@ufz.de

Received and published: 1 November 2011

Dear authors,

Three reviewers provided constructive reports ranging from positive to critical, but all reviewers consider the material presented deserving of publication after various degrees of revision.

The comments are quite consistent and are of a nature that makes me believe they can be adequately addressed by a proper revision. From your response to the comments I gather you share this viewpoint. I therefore suggest you consider the comments carefully and revise the paper accordingly.

C4781

I intend to send the revised paper to one or two of the original reviewers for additional feedback.

Yours sincerely,

Gerrit de Rooij Editor HESS
