The comments from Alberto Viglione are extremely valuable and point to the need for the further development of networks within Africa. I was not aware of the Addis Ababa initiative and the level of enthusiasm, as well as the number of people involved is very encouraging. I am not sure how I can incorporate this information into a revised version of the paper, but if Alberto is willing to give permission to do so (with due acknowledgement), I would be very happy to add a paragraph that refers to what is happening in Ethiopia.
