

Interactive comment on “Soil erosion and sediment delivery in a mountain catchment under land use change: using point fallout ^{137}Cs for calibrating a spatially distributed numerical model” by L. C. Alatorre et al.

Anonymous Referee #1

Received and published: 6 February 2012

Dear editor, I have attached my comments as a pdf. As you will see I have some questions for the authors and I suggest they try to solve some of the problems with the model. Therefore I was hesitating between minor and major revisions. I am willingly to review the manuscript again after corrections if necessary.
