Received and published: 23 March 2011

We thank the reviewers for their constructive comments and are now busy improving the manuscript. In response to the reviewers' comments we propose the following:

- With help of the reviewers' suggestions, we will change the title to “Anatomy of extraordinary rainfall and flash flood in a Dutch lowland catchment”
- We will add a Figure to show the spatial variation in potential surface runoff in the catchment. To restrict the number of Figures, we will merge Figures 6 (cumulative rainfall) and 7 (rainfall intensity).
- We will clarify the research objectives and conclusions.

C605

- We will go through a few rounds of editing (including a review by a native speaker).

We will submit a revised version as soon as possible.
