

Interactive comment on “Using comparative analysis to teach about the nature of nonstationarity in future flood predictions” by S. B. Shaw and M. T. Walter

T. Wagener (Editor)

thorsten@enr.psu.edu

Received and published: 13 March 2012

Dear Drs. Shaw and Walter,

Your response to the reviewer comments looks appropriate to me. Please adjust your manuscript accordingly and submit it for further review. Please interpret the need to include more literature broadly so that your references are reflective of the general literature.

Best wishes,

C6355

Thorsten Wagener
