

Interactive comment on “Mass transport of contaminated soil released into surface water by landslides (Göta River, SW Sweden)” by G. Göransson et al.

G. Göransson et al.

gunnel.goransson@swedgeo.se

Received and published: 22 March 2012

Dear Editor A revised manuscript will be prepared since our response to referee comments has been accepted. We will upload a revised manuscript in mid-April. Would it be possible to have our manuscript back as a word-file, because then we would have the very last of the changes that were made before the manuscript was made available online

Kind regards Gunnel Göransson
