Dear Authors, The discussion phase is approaching to its closure and I'd take this occasion to thank our referees for their excellent work on that paper. After having given a look at all the exchange of comments I think that the manuscript is a good contribution, but it requires some refinements. I agree with the constructive criticisms raised by the various referees, who also looked at your work from different perspectives. I do not have much more to add than that written by the reviewers, but I also suggest you should leave Appendix A out of the paper.
