Received and published: 29 June 2012

We appreciate the referee’s comments. In line with these comments a definition of simulation games will be added to the text. The definition clarifies (partly implicitly) the difference between simulation and simulation games. Rows 3-4, p. 3065 will be changed accordingly. The definition is as follows:

The core idea of a simulation game is that it brings together elements of simulations (a real-life situation, event or activity is imitated) and games (players, rules, competition, co-operation).

A reference to Lankford and Watson, 2007 will be added to the paper. Given the topic
