Dear reviewer, I am very grateful for your comments. Your suggestions will be helpful to improve the manuscript further. Because the SLsw's science foundation is very important for the manuscript, so I want to give the relative information firstly. The detailed science foundation of Soil Loss Evaluation Index can be found in the paper by Fu et al.(2006): "A multiscale soil loss evaluation index" (Chinese Science Bulletin 2006 Vol.51 No.4: 448~456). Best wishes.
