

***Interactive comment on* “Characterization of spatial coseismic response of groundwater levels in shallow and deep parts of an alluvial plain to different earthquakes” by M. Parvin et al.**

A. Bronstert (Editor)

axelbron@uni-potsdam.de

Received and published: 22 October 2012

I have received the following few lines from a reviewer (not able to access the HESS-online system):

"I have gone through the manuscript and I think the corrections which are very essential are already made in red colour and it is great. The paper can be accepted for its publication in your journal with minor corrections like some of the references are in the text and not reflected in the list. The authors should once again check references properly."
