

Interactive comment on “A framework for global river flood risk assessments” by H. C. Winsemius et al.

G. Di Baldassarre (Editor)

g.dibaldassarre@unesco-ihe.org

Received and published: 7 November 2012

The manuscript by Winsemius et al. was reviewed by three Reviewers.

Two of them indicated that the manuscript should be reconsidered after major revisions, while one recommended minor corrections.

The authors have provided a first response to the three Reviewers.

Accordingly, I encourage the authors to re-submit a revised manuscript to HESS, but only after satisfactorily addressing all Reviewers' comments.

A re-submission does not ensure a final publication in HESS as I will forward the new

C5196

version to the original or new Referees for further review.
