

Interactive comment on “Three-dimensional monitoring of soil water content in a maize field using electrical resistivity tomography” by L. Beff et al.

Anonymous Referee #1

Received and published: 29 November 2012

I find that the authors of the manuscript hess-2012-248, "Three-dimensional monitoring of soil water content in a Maize field using Electrical Resistivity Tomography" have carefully addressed my comments on the revised manuscript version. I therefore recommend the latest version of the manuscript for a publication in HESS.
