Received and published: 21 December 2012

The manuscript by Ujlemann et al. was revised by two referees.

Reviewer#1 indicated that the paper should be reconsidered after major revisions, while Reviewer#2 provided a few minor comments. The authors have already replied to both referees.

Based on these facts, I would like to encourage a submission of a revised manuscript to HESS. Needless to say, a resubmission does not ensure a final publication as the revised version will be forwarded to the original (or new Referees) for further review.
