

Interactive comment on “An opportunity of application of excess factor in hydrology” by V. Kovalenko et al.

V. Khaustov

vitaly.khaustov3@mail.ru

Received and published: 31 January 2013

Article opens new opportunities provided reliable estimates of water discharge in the design of hydraulic structures. At present, the hydrological calculations excess factor is ignored, which substantially lowers project costs of water. Become relevant and welcome.

Associate Professor of hydrophysics and hydrological forecasts Russian State Hydrometeorological University Khaustov V.A.
