Received and published: 2 April 2012

Dear Mr. Doppler,

I read the reviewer comments and your manuscript. I aggree with both reviewer that the manuscript presents a rare and very valuable datase. It neverless needs considerable revisions before it can be accepted for publication.

As reviewer 2 I am a fan of the old school traditional structure of a scientific papers. This facilitates both the review and targeted reading. The second major point concerning the adsorption kinetics seems well reasoned and should be clearly discussed in the revised manuscript.
