

Interactive comment on “Hydrologic and geochemical modeling of a karstic Mediterranean watershed” by N. P. Nikolaidis et al.

E. Zehe (Editor)

erwin.zehe@kit.edu

Received and published: 2 April 2012

Dear Dr. Nikolaidis,

as you can see both reviewers - which are leading experts in karst hydrology and hydrogeology - came up with very critical comments. Especially reviewer 2 has doubts about the scientific soundness of the proposed work and doubts that the catchments of the karst system can be determined without tracer tests and a proper conceptual model.

I feel that these points are hardly addressed within the usual time frame of major revisions. Nevertheless they should be addressed before the study can become acceptable for publication in HESS.

Best regards,

Erwin Zehe
