Received and published: 25 February 2013

The reviewer has indicated that he generally approves the paper and would like to see future applications of the presented methodology in different locations. He offers comments, feedback, and suggestions to improve the paper and polish it up. We must say that we are so grateful for his thoughtful comments and helpful suggestions to restate some terms, paragraphs, and improve the figures. We make nearly all these recommended changes.

In the attached document we provide our response to each comment and point out

C6955

manuscript revisions that address those comments. Numbered red text quotes original reviewer comments. Our responses are in black. Italic smaller black text quotes directly from the revised manuscript.

Please also note the supplement to this comment:
