In table 1 we provide following information on the station data used in our study:

ID	Station ID
Name	Station name
Missing	List of missing years in the considered period (1989-2003)
x	longitude [m] in the Czech S-42 - Pulkovo 1942/Gauss-Krüger zone 3 projection
y	latitude [m] (same projection)
z	altitude [m]
r.cv	coefficient of variation of monthly May–September precipitation [-]
r.p95	mean fraction of precipitation above the 95% quantile of monthly May–September precipitation [-]
r.mea	average May–September precipitation [mm]
R	R-factor [$\text{MJ ha}^{-1} \text{ mm h}^{-1}$]

Table 1: Overview of 96 stations used within the study.
