

Interactive comment on “Characteristics of rainfall events in RCM simulations for the Czech Republic” by V. Svoboda et al.

J. Seibert (Editor)

jan.seibert@geo.uzh.ch

Received and published: 5 October 2016

Dear reviews and authors, thanks for your contributions on discussing this manuscript. Based on this discussion and my own reading I find that this manuscript potentially could make a valuable contribution, but that the results in the original versions were not presented clear enough to allow assessing the novel aspects in this study. In the revisions, the results need to be clarified and the novel aspects to be emphasized more.

Best regards, Jan Seibert
