Interactive comment on "Hydrological response in the Danube lower basin to some internal and external climate forcing factors" *by* I. Mares et al.

I. Mares et al.

ileana.mares@yahoo.com

Received and published: 22 September 2016

Dear Reviewer,

I have attached a new version of our manuscript. This version is modified in comparison with the previous version, which was sent you. Now we took into account of comments and suggestions received from second reviewer, and we have improved English. We have also included more references concerning physical mechanisms. Some paragraphs, were restructured for a better understanding.

I hope you find improved our manuscript.

Thank you very much for the important support, that you give us.

With best regards,
