Interactive comment on "Sensitivity of potential evapotranspiration to changes in climate variables for different climatic zones" *by* Danlu Guo et al.

G. Ravazzani (Referee)

giovanni.ravazzani@polimi.it

This paper does not present absolutely new findings but presents a systematic application of existing methods to assess sensitivity of models to compute potential evapotranspiration, that is a relevant topic when dealing with climate change impacts analysis. So the paper is interesting, it is well written and matches the scope of this journal. Some specific comments in the supplement to this comment.
