Interactive comment on "Sensitivity of potential evapotranspiration to changes in climate variables for different climatic zones" *by* Danlu Guo et al.

Anonymous Referee #2

Received and published: 21 November 2016

Dear editor,

I have completed a review of this above mentioned manuscript and I recommend accepting this article with minor revisions. Overall, the paper is well written and concise. The goals of the paper are outlined well and the results are presented in a clear manner.

There are few minor comments that I have attached as a pdf file below.

Please let me know if you have further comments or questions.

Kind regards,

Angela Bowman
