Interactive comment on "Simulating cold-region hydrology in an intensively drained agricultural watershed in Manitoba, Canada, using the Cold Regions Hydrological Model" *by* Marcos R. C. Cordeiro et al.

J. Seibert

jan.seibert@geo.uzh.ch

Received and published: 7 December 2016

In one of our MSc courses within the Earth System Sciences program at the University of Zurich the students were given the assignment to review selected manuscripts in HESS-D. This manuscript was one of the selected ones and as I found the student's review well-written and valuable, I want to share these comments here (see attached pdf).

Best regards,

Jan Seibert
