

Authors' Response

Dear Prof. Harrie-Jan Hendricks Franssen,

Thank you very much for your final decision that our manuscript entitled “Benchmark levels for the consumptive water footprint of crop production for different environmental conditions: a case study for winter wheat in China” is accepted to be published in HESS. We are very happy!

We have corrected the three points as you commented in the revised manuscript. The revised places are colored in RED in the updated text. There are some changes happened regarding all of three authors' affiliations, we also update the related information.

We thank again all the efforts of Editor and two Referees on our manuscript.

Sincerely,

La Zhuo, Mesfin M. Mekonnen, Arjen Y. Hoekstra
